Skills

- Programming Proficiency
- English Language
- Proficiency (B1)
- Familiarity and experience with frameworks
- Web development skills
- Database management
- Problem-solving abilities
- Team collaboration

Education

I am a university student at Universidad del Valle de Guatemala, with a distinguished academic record and a cumulative GPA of over 85%. I am pursuing a degree in Computer Science Engineering, where I have acquired skills in various programming technologies, including Python, Java, Object-oriented Programming, Pandas, HTML, CSS, JavaScript, and Android Studio. In database management, I am proficient in SQL, with experience using PostgreSQL, MySQL, DBeaver, and Oracle.

Currently, I am enrolled in advanced courses such as Web Technology and Development, where I am expanding my knowledge of HTML, CSS, and JavaScript, and beginning to work with frameworks like React and Node.js. I am also taking a Database 1 course, where I am learning SQL and its commands in depth. Additionally, I am studying Page Design and Project Management based on software tools.

Work Experience

I worked as a web developer at a development company, primarily utilizing the Laravel framework and PHP language for frontend, backend, and API programming, including database calls. One of the projects I contributed to was the development of anamnesis for the Pediatric Foundation of Guatemala, where I tackled frontend issues. Through this role, I gained basic knowledge of Linux server management.

In summary, I am a dedicated and committed university student with a broad set of skills in programming technologies and problem-solving. I have expertise in SQL, Python, Java, JavaScript, Kotlin, HTML, and frameworks such as Laravel and React. Additionally, I have experience with Bootstrap and jQuery. I am eager to continue learning and contribute effectively to my team.
